

PULBOROUGH MEDICAL GROUP

COLLECTION OF PRESCRIPTIONS AND DISPENSED MEDICATIONS

Repeat Prescriptions

Routine Repeat Prescriptions or Scripts are the 'paper' prescriptions for your medication. They inform a pharmacist which medication should be dispensed to you. Before a script is issued, each item of medication is carefully checked by a doctor, and then checked again by a pharmacist before being dispensed. This process takes a little while to complete.

Scripts that are to be collected from PMG, without the medication being dispensed, will be ready for collection after two full working days from the time of request. If you wish your medication to be dispensed from Cordens Pharmacy, then an additional full working day is required. This arrangement is summarized on the chart below:

| REQUEST MADE BETWEEN: | SCRIPT COLLECTION AFTER 2.00PM: | MEDICINE COLLECTION AFTER 2.00PM |
|-----------------------|---------------------------------|----------------------------------|
| MON 11AM - TUES 11AM | THURSDAY | FRIDAY |
| TUES 11AM - WED 11AM | FRIDAY | MONDAY |
| WED 11AM - THUR 11AM | MONDAY | TUESDAY |
| THUR 11AM - FRI 11AM | TUESDAY | WEDNESDAY |
| FRI 11AM - MON 11AM | WEDNESDAY | THURSDAY |

Please note:-

Non-dispensing patients should clearly mark their requests CORDENS, if they intend to collect their medication on site, or OTHER if an alternative place of medicine collection is required. We are obliged to assume that scripts, which are not marked either way, are not to be dispensed at Cordens. However, if you attend Cordens expecting your medication to be ready, and are able to wait, we will of course dispense it for you.

Dispensing patients will automatically have their medications prepared for collection from the dispensary at Cordens unless otherwise requested.
